- Management Skills
- Creativity
- Digital Marketing
- Negotiation
- Critical Thinking
- Leadership

LANGUAGE

- English
- Spain

ABOUT ME

I'm a final-year BCA student passionate about exploring the boundaries of technology — from web and software development to AI, IoT, and cybersecurity. I learn by building, experimenting, and breaking limits. Recently selected in the Smart India Hackathon (Internal Round), I've developed apps, AI-driven websites, and personal projects that reflect my curiosity and determination. I believe in solving problems creatively and turning abstract ideas into real, working solutions.

EXPERIENCE

Smart India Hackathon (Internal Selection)   2025 - Present
App Developer — Kerala Tourism Data Collection App
Developed an application to collect and analyze tourist data for Kerala's tourism department. Designed the app's data architecture, UI flow, and logic to streamline regional data handling.

AI-Powered Portfolio Project   2024
Creator & Developer
Built a personal portfolio using AI-assisted tools to understand how artificial intelligence can accelerate coding and design. Explored prompt-to-code workflows for responsive design and automation.

Messaging Application (Ongoing Project)   2025- Present
Full Stack Developer
Currently developing a secure, real-time chat application using JavaScript and Firebase. Focus on encryption, UI responsiveness, and backend optimization.

AI Agent Website Series   2024
Developer & Designer
Built three small AI-integrated websites to test workflow automation and web optimization through intelligent agents.
